PROJECTS

Conveyor Monitoring and Fault Detectin Using PLC and HMI 1 Year

Domain: Automation Based Project

Members: 4

Normally conveyor used for transporting the product for one end to another and we can used anywhere. But this conveyor project and their supportive assembly make special for particular action i.e. where need of fresh air in the presence of dirt particles. Here, this assembly is used in textile industry where lots of dust particles produced during the making of thread and textile product. It's creates inhaling problem in employees those who work near to this area. Normally Asthma, Skin problem & lots of disease happened here. That's why this project helps to reduce the inhaling problem.
