EXPERIENCE

Quality Assurance Engineer

1st January, 2021 - Present

Amod Group of Industries – Ahmednagar

- SAP entries for Production Store, Quality.
- Pre-dispatch inspection and reports.
- Production & rejection analysis.
- CAPA and Root cause analysis.
- 5s coordinator.
- Making OPL, SOP and visuals.
- Training and Audit of operators (de-flashing).
- Line inspection of de-flashing, machine operators (30 to 40) .
- Induction training of contactor assembly process, testing of contactors, HF assembly, DOL starter assembly.
- Handling tools like CMM and TRIMOS.
- Using instruments like vernier caliper, height gauge(Vickers hardness test, winding turns tester, destructive plating thickness tester), pin gauges, snap gauges, thread plug gauge.
- Knowledge of injection/transfer & compression moulding.
- Knowledge of PPAP(Production Part Approval Process) , FMEA (Failure Modes & Effects Analysis) documentation.

In-Plant Trainee

June, 2019 (One Month)

L&T Electrical and Automation – Ahmednagar

EDUCATION

Bachelor of Engineering, Electrical

August, 2017 – August, 2020

Dr. Vithalrao Vikhe Patil College of Engineering – Ahmednagar, Maharashtra (IN)

- Average CGPA: - 6.84/10

Diploma in Electrical Engineering

May, 2017

Government Polytechnic – Ahmednagar, Maharashtra (IN)

- Passing Marks: - 79.29%

SSC

May, 2014

Bhauasheb Firodiya Highschool and Jr. College - Ahmednagar, Maharashtra (IN)

- Passing Marks: - 86.6%

AWARDS & ACCOMPLISHMENT

AWARDS

- Classical Singing
Issued: - April, 2019. Akhil Bhartiya Gandharva Mahavidyalaya Mandal, Mumbai
Completed 3 levels (Praveshika Purna) out of 7 levels (Visharad).

COURSES & WORKSHOPS

- AutoCAD Certified Course (Certification Number:- D7981781840)
- 3 days Hands-on workshop on “Solar PV Technologies, design and installation of off-grid solar PV Power Plant”
- 2 days state level workshop on “Hybrid Electrical Vehicles: Opportunities & Challenges in India

PROJECTS

Work Station Standardization

- Aim was to improve quality and productivity.
- Designed SOPs to improve production.
- Designed work station to organize tools, according to SOPs, to reduce production time.
- Designed draught in work station to collect all de-flashed residue at one place.

Minimization of Loose Flash found on Components

Aim was to get finished product completely flash free and reduce the rejection rate.

Advancement in crimping machine to minimize rejection in electromagnet

June, 2019 – March, 2020

Competition/Purpose: - Engineering Final Year Project

Hybrid Solar Bicycle

November, 2016 – April, 2017

Competition/Purpose: - Diploma Final Year Project
