About

- Result oriented chemical engineer with a proven record in operations, now aspiring to pivot towards process design and simulation. A resourceful problem solver with a strong foundation in chemical engineering, ready to embrace new challenges and drive excellence in process optimization

Experience

- **Linde India Limited** Sept - 2021 - Jun - 2022
GET (operational excellence)
 - Monitoring of daily cylinder filling operations, cryogenic tank loading and unloading, filling small cryogenic liquid cylinders, cylinder testshop activities.
 - Reviewed and updated standard operating procedures, P&IDs and MSDs
 - Engaged with newcomers to make them familiar with plant operations and process
 - Was a part of major projects like modification of existing lines to convert them into a food grade gas mixture filling line and LIV cylinder(medical grade O2) filling station set up

Education

- **NIT Durgapur** 2017-21
Btech in chemical engineering
8.54

Projects

- **Modification of existing line and conversion into Food grade cylinder filling unit**
- **LIV cylinder filling unit**

Skills

- Plant operations
process safety
hazard and risk analysis
preventive and corrective maintenance,
Aspen plus
Root cause analysis
SOP
P&ID
