

Axiom Worx

Equinox Engineering provides practical experience, innovative solutions and proprietary software for project management services

Integrate

Axiom Worx is a completely integrated system that unites all project disciplines together in a single solution for ultimate project success. Using highly intuitive modules, strict adherence to the project work/cost break down is enforced, while accommodating various unique discipline requirements. This allows each department to complete their deliverable objectives their way, while conforming to the project structure; providing assurance to project controls, management, and our clients that the project is the single and only measurement of success.

Axiom Worx captures the history of deliverables, projects, programs, and qualitative lessons learned each day that can be reviewed regardless of resource turnover. Every invoice, project summary, document history sent can be supported by the tens, thousands, even millions of records within seconds.

Collaborate

Since Axiom Worx engages all project resources within a singular platform, distractions are reduced, allowing teams to focus on critical project tasks. With continually monitoring of user interactions and several standard workflows, Axiom Worx ensures that data is being reviewed and vetted prior to landing on cost reports, purchase contracts, rate schedules and more; giving project teams the confidence that they have the most reliable, up to date information available.

From task assignments to payroll or purchase orders to document management, all aspects of the project lifecycle take place within Axiom Worx. Whether it's quickly entering hours of work, accurately reporting on project progression, reviewing real-time statuses of vendor document submissions, or generating invoices with ease. Equinox Engineering is Powered by Axiom Worx.

Reiterate

- » Conform to any client requirement with flexible *Projects*
- » Stay in the know and on the ball with comprehensive *Project Financials*
- » Effortlessly access *Documents* anytime, anywhere
- » Get valuable insights with *Project Intelligence and Advanced Analytics*
- » Deliver repeated success with *Procurement*
- » Proven technology, applied to thousands of successful energy projects.
- » Best-in-class performance with highly robust data management framework.
- » Powerful enough to match the scale and scope of today's complex EPCM projects.
- » Full control to manage all types of EPCM project requirements in real-time.
- » On-demand data reporting capabilities for all project aspects and milestones.
- » Dedicated software development team that provides expedient, knowledgeable user support.
- » Customizable to meet the exact need for every unique client and project.
